

TPV10 and TPV11 Off-fault Stations

light red stars are stations below the earth's surface on the far side of the fault

black star indicates the center of the nucleation patch, for reference

12 Off-fault Station Locations

8 stations at the earth's surface:

0 km along strike, 0 km depth, and +/-1.0, +/-2.0, +/-3.0 km perpendicular-distance from the fault **trace**
 +12 km along strike, 0 km depth, and +/- 3.0 km perpendicular-distance from the fault **trace**

4 deeper stations:

0 km along strike, 0.3 km depth, and +/-0.5 and +/-1.0 horizontal-distance from the **location of the fault at 0.3 km depth**
